

Always the right performance

MP47 Hectorra 3

FOR COMPACT-CLASS UP TO SUVs

- ▶ High level of driving safety in the wet
- ▶ Good handling and shorter braking distances
- ▶ Increased mileage
- ▶ Reduced noise

MP47 Hectorra 3

FOR COMPACT-CLASS UP TO SUVs

Technical Highlights

High level of driving safety in the wet

Four wide grooves around the circumference hold a tremendous volume of water, improving its displacement. Driving safety is improved on wet roads and the risk of aquaplaning is reduced.

Good handling and shorter braking distances

Rigid blocks and ribs in the centre improve the transfer of traction and braking forces to the road. This results in a direct steering response. On dry roads the handling is good and braking distances are short.

Increased mileage

The tread pattern has been optimised in terms of the distribution of material and rigidity between the tread elements. Abrasion is reduced as a result of the even pressure distribution on the contact area. This leads to increased mileage and tyre life.

Reduced noise

The noise emissions caused by tread elements in the centre of the contact area are reduced as a result of the closed outer shoulder. This reduction in noise enhances the tyre's driving comfort.
